

Upbeat

YOUR LOCAL POLICING UPDATE.

October has been a busy Month across the force which has seen local officers giving assistance to some resource intensive incidents. The latest, and ongoing incident being the helicopter incident in the City which has seen local staff used daily at the scene.

We have had the serious accident on the A447 at Osbaston resulting in the untimely death of a young driver; our condolences go to her family.

October saw an increase in reported burglaries including 5 reported in Markfield, 7 in Witherley, Atterton, Fenny Drayton, Stoke Golding, Congerstone and Market Bosworth.

This is a timely reminder to be extra vigilant, reporting any suspicious incidents to us via either 101, 999 or via the Leicestershire Police incident reporting portal. Local officers will be conducting extra patrols acting on intelligence gained from numerous sources including from our colleagues across the border in Warwickshire and Staffordshire.

Our Chief has invested heavily in new technology allowing its available “on the go”. We have all been on the course over the last couple of weeks, training for its roll-out. It is an App. Based system which allows searching and working on the main Police systems from a mobile phone.

One of the benefits is the ability to read fingerprints and get full intelligence back on a person within 30 seconds.

We now also have the facility to use Police drones, which have been used successfully on our area within the last few weeks.

Local schools have been visited giving inputs to the children around bonfire night, fireworks and the associated anti-social behaviour that tends to increase at this time of the year. Codename celebrate safely.

A couple of warrants have been executed recently based on intelligence around drug cultivation and modern day slavery with positive results.

Our colleagues in the Specials have been in the area conducting speed enforcement in villages where recent complaints have been received. This includes Barlestone.

We look forward to seeing anyone who may be attending the upcoming Remembrance Day parades.

In October we received 485 incidents recorded to our area.

Finally; a message we would like to pass to Parish Councils' regarding crime reporting. Please call 101 or 999 in an emergency. We would suggest that direct e-mailing neighbourhood officers is not the most appropriate method. By calling the above numbers, a trained member of staff will take your report and log it correctly, by using the most appropriate recording method for the incident.

Please don't report crime to us via a Facebook message, or email.

In an emergency always call 999, otherwise call 101
